

UDIOMUNO EZEKIEL EVIOGHENE

Front-End Web Developer

SUMMARY

From the Moment I produced “Hello World” in the console of my first application, I knew I was hooked into the world of software development. Since then I have taken Software development as an engaging challenge to continually learn and improve my skills in creating high-quality user-friendly software. What started as a simple “hello world” has become a full-fledged passion that only gets more exciting as the years goes by.

Below you’ll find some of the projects I’ve completed that showcase my skills and general background knowledge
